MySQL Notifier

Database connections will be migrated

Connections will be migrated to use MySQL Workbench's connections file.
Do you want to migrate connections now?

MySQL Notifier now works with the connections file used by
MySQL Workbench if it is installed.

MySQL Notifier will attempt to merge all existing connections
with MySQL Workbench and in order to do this
MySQLWorkbench must not be running.

Please make sure MySQL Workbench is closed to continue with
the merging operation.
If you choose not to migrate connections now, you will be
prompted later to perform the migration.

MySQL Notifier now works with the connections file used by MySQL Workbench if it is installed.

MySQL Notifier will attempt to merge all existing connections with MySQL Workbench and in order to do this MySQLWorkbench must not be running.

Please make sure MySQL Workbench is closed to continue with the merging operation.
If you choose not to migrate connections now, you will be prompted later to perform the migration.

MySQL Notifier ahora funciona con el archivo de conexiones utilizado por MySQL Workbench si está instalado.

MySQL Notifier intentará fusionar todas las conexiones existentes con MySQL Workbench y para hacer esto MySQLWorkbench no debe estar ejecutándose.

Asegúrese de que MySQL Workbench esté cerrado para continuar con la operación de fusión.
Si elige no migrar las conexiones ahora, se le solicitará más adelante que realice la migración.
